

TITLE

**IONOMER RESINS AS INTERLAYERS FOR USE WITH IMBEDDED OR
ATTACHED IR REFLECTIVE OR ABSORPTIVE FILMS IN LAMINATED
GLAZING APPLICATIONS**

5

ABSTRACT OF THE DISCLOSURE

This invention is glass laminate article comprising a film which can block the transmission of infra red (IR) light. A laminate of the present invention comprises at least two sheets of a non-plasticized thermoplastic polymer which forms the outer layers of a three-layer IR-blocking laminate film.
